AE SMART

ALL-SCENARIO · ONE-STOP SOLUTIONS

EMPOWERING EFFICIENT COLLABORATION SPACES

Solution for Conference | Teaching | Hotel | Control | Command

AE SMART

AE SMART specializes in smart meeting and collaboration space solutions, providing global channel partners, system integrators, and project customers with integrated products and services covering professional audio, video, paperless conferencing, LED displays, and intelligent control systems.

We offer a complete portfolio of hardware and software products, including professional AV equipment, paperless conference systems, LED display solutions, meeting control systems, as well as supporting products such as digital podiums, motorized lift terminals, operator consoles, and more — designed to meet the construction needs of various meeting spaces, educational environments, and command & control projects.

Focusing on the development trends of modern office and collaboration environments, AE SMART continuously enhances its product design and system integration capabilities, striving to help customers build more efficient, stable, and easy-to-manage collaboration spaces.

Backed by a mature product portfolio, reliable delivery capabilities, and extensive project experience, we consistently empower our partners to expand into government, enterprise, education, hospitality, and public service markets, working together to create more competitive project solutions.

We focus not only on the equipment itself, but also on how the equipment serves efficient collaboration between people and spaces.

OUR ADVANTAGES

- **Innovation Driven:** Leveraging our R&D center in Wuhan Optics Valley, AE SMART continuously drives innovations in collaboration technologies, AV applications, and intelligent control systems to enhance user experience and project value.
- **Integrated Manufacturing:** With modern manufacturing facilities and integrated production capabilities, AE SMART ensures consistent product quality and reliable delivery to provide long-term support for partners.
- **Integrated Solution Capability:** From meeting spaces and educational facilities to control rooms and command centers, AE SMART provides complete product portfolios and project-oriented support.
- **International Quality Standards:** Our products strictly follow quality management systems and comply with internationally recognized standards and certifications.
- **Future-Oriented Vision:** We continuously monitor the evolution of modern collaboration environments and enhance our product ecosystem and integration capabilities to help partners adapt to the requirements of future smart space construction.

FACTORY AND MANUFACTURING CAPABILITIES

AE SMART adheres to in-house original manufacturing, establishing a complete manufacturing system from R&D and design to large-scale delivery, ensuring product quality consistency and project delivery stability.

Our R&D center is located in Wuhan Optics Valley, where we continuously monitor the development trends of modern meeting collaboration and intelligent spaces, providing ongoing product optimization and technical support for audio-visual conferencing systems, paperless conferencing systems, and related applications.

With modern production facilities and a lean manufacturing management system, we have achieved standardized and controllable production processes — from key components to final assembly — ensuring stable performance and reliable delivery capability for every product across different project environments.

In addition, AE SMART offers flexible OEM/ODM collaboration capabilities, enabling product combinations and customization support tailored to the project requirements of our channel partners, covering digital podiums, motorized lift systems, meeting control devices, and related collaboration hardware.

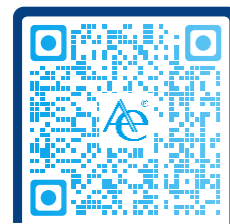

AE SMART is committed to providing a stable, reliable, and sustainably deliverable product foundation for diverse application scenarios including government, enterprise, education, hospitality, and command centers, supporting partners in efficiently executing project deployments and long-term operations.

Motorized Monitor

Motorized Retractable Monitor

15.6" screen size available
10.1" nameplate in the back of screen available for option
Optional external microphone

ULTRA-THIN MOTORIZED RETRACTABLE MONITOR

AX-MUF SERIES

Keywords

- Ultra-narrow bezel
- Anti-glare treatment
- 40mm-wide cover plate
- Ultra-thin and light housing
- Safe, DC 12V power supply
- Dry contact for centralized control
- Embedded 10.1-inch nameplate
- Free nameplate software available
- Auto calibration for microphone
- Independent movement for monitor and microphone

DIGITAL / SECURE / TRANSFORMATIVE

Transitioning to a fully digital meeting platform not only safeguards sensitive information by design, but also represents a truly transformative step in modernizing how organizations collaborate and make decisions.

PAPERLESS CONFERENCE SYSTEM: SECURITY ADVANTAGES

1. Enhanced Data Security and Information Control
This fully digital platform safeguards sensitive information through encrypted storage, granular access permissions, and detailed activity logs. It eliminates the risks associated with physical document mishandling or unauthorized access, ensuring confidentiality and compliance.

2. Efficient and Inclusive Collaboration
By enabling real-time content sharing, simultaneous annotation, and instant feedback from any location, the system transforms traditional workflows. This creates a more dynamic and inclusive meeting environment, breaks down geographical barriers, and seamlessly integrates remote participants.

3. Data-Driven and Agile Decision-Making
By digitizing the entire meeting process – from agenda distribution and minute-taking to task assignment – the system establishes a structured and traceable decision-making process. This allows faster consensus-building, automated follow-up actions, and easier performance tracking, and helps organizations execute strategies more effectively.

Motorized Monitor

Motorized Retractable Monitor

AX-FW SERIES

NO COVER PLATE MOTORIZED RETRACTABLE MONITOR

15.6"/17.3" screen size available

Keywords

- Ultra-narrow bezel
- Safe, DC 12V power supply
- Fast, single-way running in 4s
- Light enough to reduce shipping cost
- 9.5mm max. cutout on table surface

Motorized Monitor

Motorized Retractable Monitor

AX-N SERIES

SLOPE TYPE MONITOR INTEGRATED

15.6" screen size available

Keywords

- Ultra-narrow bezel
- Anti-glare treatment
- Elegant blend of black and silver
- Auto calibration for microphone
- 2.4-inch touch control panel
- Independent movement for monitor, nameplate, and microphone
- Power loop reduces cables under the table
- Free nameplate software available

EFFICIENT COLLABORATIVE SUSTAINABLE

Paperless Meeting System: Key Advantages

- 1. Maximum Efficiency & Focus:**
Eliminate all printing, distribution, and filing. Access and annotate documents in real-time on any device. Use integrated tools for instant voting, task assignment, and minute generation, streamlining the entire meeting workflow from preparation to follow-up.
 - 2. Enhanced Security & Control:**
Replace vulnerable paper with secure digital files. Apply granular permissions, watermarking, and detailed activity logs. Maintain full control over document access and sharing, ensuring confidentiality and a clear audit trail for sensitive discussions.
 - 3. Sustainable & Professional Impact:**
Drastically reduce paper consumption, waste, and your organization's carbon footprint. Demonstrate a commitment to environmental responsibility (ESG) while presenting a modern, technologically advanced corporate image.
- Empower smarter, secure, and sustainable collaboration.

PORTABLE PROJECTOR

Key Advantages

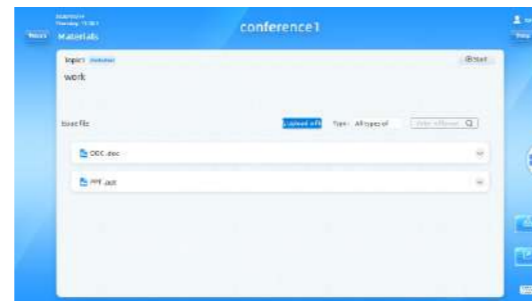

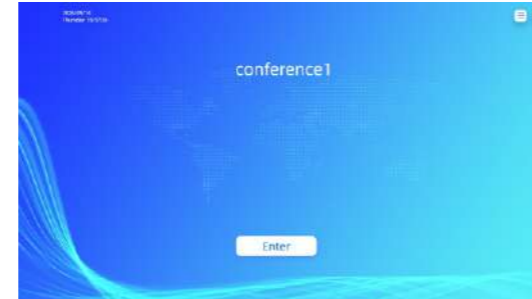

- *Highly Integrated – Projector, wireless charger, Bluetooth speaker, and Android motherboard in one device*
- *Full Ports & Accessories – Complete interface options, including remote control and laser pointer*
- *Bright & Sharp – 2600 ANSI lumens, supports 30-120 inches of clear projection*
- *Smart Adaptive System – Auto focus, 4D keystone correction, and screen-adaptive*
- *Long LED Life – 30,000 hours*
- *Wireless Connectivity – Supports wireless projection, Bluetooth, and Wi-Fi*
- *Suitcase-Style Portable Design – handle + wheels for effortless mobility*
- *All-in-One Mobile Meeting Device – Designed for business travel and flexible meetings*

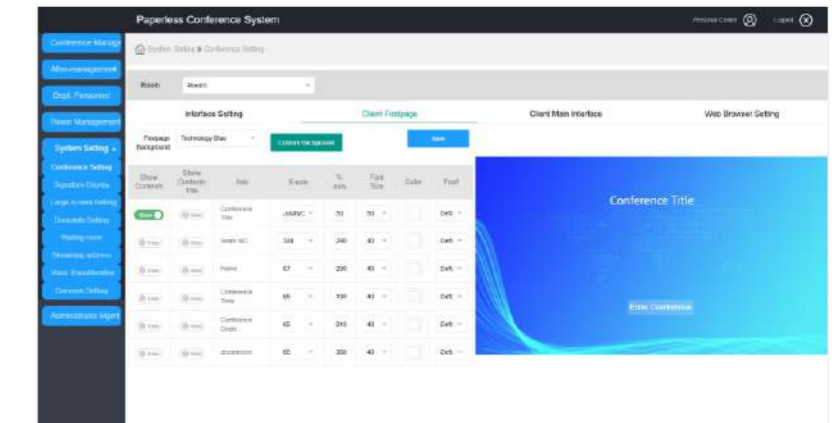

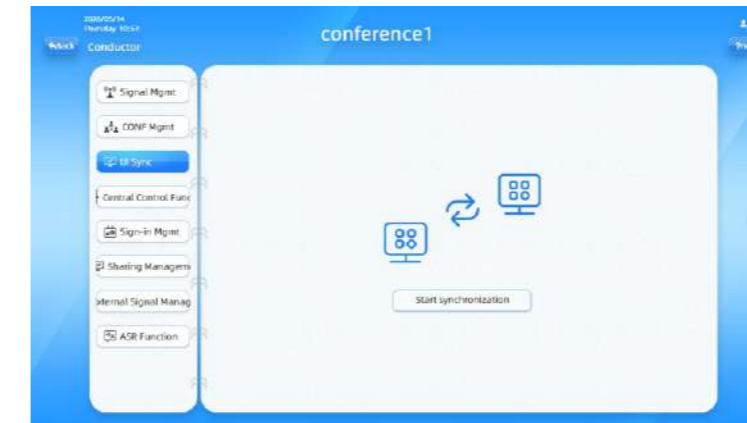

Corporate Meetings / Trade Shows & Commercial Events / Mobile & Travel Use / Home Entertainment

PAPERLESS CONFERENCE SOFTWARE
Simple · Green · Professional

- Fully Paperless – Eco-friendly and efficient, no printing, no waste.
- Customizable Interface – Show or hide modules as needed, adaptable to any meeting scenario.
- Hidden Function Bar – Clean main interface, one-click access to powerful tools like external signal, screen sharing, and follow the presenter.
- Built-in Web Browsing & PC Mode – Browse the internet or use PC functions without leaving the app.
- Security – Host-only permission control prevents unauthorized operations and data leaks; supports secure one-click data clearing after the meeting.

Turn every conference into a smart, seamless & sustainable experience

- Complete Meeting Management – Add, start, end, or delete meetings; review all materials after the meeting.
- User & Room Management – Add, edit, or remove attendee information; add or edit meeting room details.
- System Backend & Large Screen Settings – Flexibly configure client background, show/hide modules, web browsing, etc., independently controlling large screen content.

MANUALLY ROTARY CABLE CUBBY

Keywords

- 15W Qi charging on top
- ABS material with UL94 certification
- Customizable surface color and texture
- Flexible configurations
- Easy installation with under-table nut

Desktop Socket

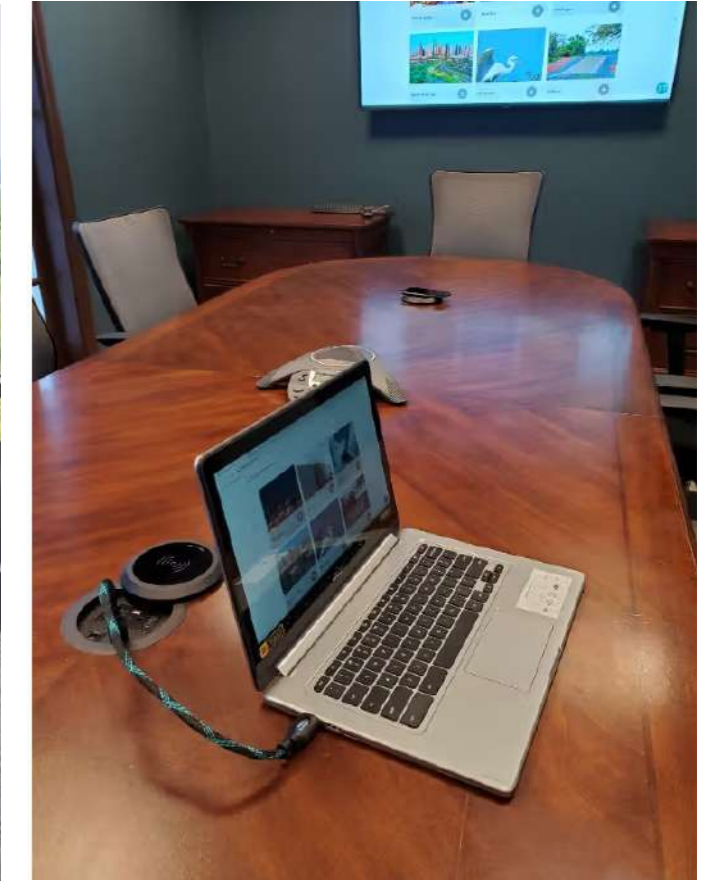

Round Type

This desktop hub offers 15W Qi wireless charging and UL94 V-0 ABS construction for safety. Modular design allows flexible combinations of power, USB, HDMI, and network ports—easy future upgrades without replacing the whole unit. Installation uses an under-table clamp nut and fixing rings; no tools needed. Customizable surface color and texture. Ideal for conference rooms, open offices, or home workspaces: safe, clean, and smart power.

M-DESKTOP SOCKET

Power Up Any Desk, Anywhere – Instantly

Say goodbye to complicated setups. Our charging insert features a snap-together modular design that lets you customize your power solution in seconds. No screws, no tools.

Designed with installers and end users in mind, it's a true plug-and-play experience. Plus, it works effortlessly with any global power standard—no matter where your clients are. The smart angled inner frame keeps cords neatly tucked away and tangle-free, so desks stay clean and safe.

One solution. Zero hassle. Global ready.
